## SUMMARY

Results-driven Software Engineer with a passion for building full-stack applications that elevate the end-user experience. Skilled in Java, JavaScript, C#, C++, React, and Agile methodologies, with a proven ability to collaborate closely with stakeholders to deliver reliable, high-quality solutions through feature development, debugging, and application support.

## EXPERIENCE

Walmart Global Tech

Bentonville, Arkansas

**Software Engineer II**

06/10/24-08/21/25

- Development on an enterprise application that serves over 2 million Walmart associates.
- Designed and developed for a scalable employee grant application using React, Node.js, and JavaScript for the frontend and Java 17 and MongoDB for backend services, delivering a secure and performant end-to-end solution.
- Provided technical service within a nine-member Scrum team, contributing to sprint planning, code reviews, and architectural discussions to ensure timely and high-quality delivery.
- Implemented critical end-to-end features, including reviewer saved filters and internal commenting functionality, improving usability and workflow efficiency while maintaining comprehensive unit test coverage using Jest for frontend components and JUnit and Mockito for backend services, ensuring code reliability and reducing regression risk.
- Improved application review efficiency by 15% through performance optimizations and workflow enhancements.
- Delivered continuous feature enhancements across associate, reviewer, finance, and administrator workflows, supporting evolving business requirements while working closely with product managers, UX designers, and cross functional stakeholders to translate business needs into intuitive, high impact user experiences.

Department of Computer and Information Sciences, Towson University

Towson, Maryland

**CIS TechHub Lab Administrator**

08/22/23-05/18/24

- Provided general technical and troubleshooting assistance to over 3,000 students and over 100 faculty and staff.
- Handled software installations (VS Code, IntelliJ, etc.), network service access requests, and PC display.
- Conducted code reviews for students in-person and via Discord to ensure that they were writing clean code for projects.

Lavner Education

Gwynedd, Pennsylvania

**IT Intern**

06/01/23-08/12/23

- Taught technical skills to over 50 students through targeted feedback, including coding, using Java 8 in Visual Studio Code.
- Assisted with setup and maintenance of on-site computer hardware, software, inventory management, and internet connectivity to ensure all programs and devices ran effectively.
- Helped with ongoing troubleshooting and technical support to staff and students.
- Debugged exception handling errors and assisted with project backup and computer clean-up.
